## Longtime Director Continues Service as Board President

Recently, Director Ted Martin was unanimously re-elected to serve as president of the El Toro Water District (ETWD) Board of Directors.

In the history of ETWD, no Director has served as president of the Board for more years than Director Martin. He was first selected by his fellow Directors to serve as president in 1999 and has continued to serve in that capacity each year.

"I am humbled by the confidence and trust that my fellow Board members continue to have in me," says Director Martin. "This is going to be another exceptional year for the District and I am thrilled to continue to use my talents to serve as president."

During Director Martin's tenure, the District has continued to provide outstanding service, as reflected by being accredited as a District of Distinction for a record three times by the **Special District Leadership Foundation (SDLF)**. **This year ETWD will begin a comprehensive, multi-phase Recycled Water Expansion Project** that will increase the amount of recycled water produced for local irrigation.
